

AluTruk Bouncy Castle Sack Truck

Product code: N25Z10WG

Rolled-up bouncy castles can be hard to move - very heavy with awkwardly curved shapes. The AluTruk bouncy castle sack truck is tried and tested in your industry and is the ideal solution. Built for heavy loads, it has a 300kg capacity. It is designed for awkward shapes. The deflated bouncy castle rests on the large (305mm deep) front mounted toe plate and leans back into the curved cross members of the frame, which helps with stability when on the move. Wheel guards protect the load from surface water / dirt being sprayed. The bouncy castle trolley is easier to push when loaded thanks to the puncture-proof tyres fitted with precision bearings.

Load capacity	300kg
Height	1310mm
Width	510mm
Length	500mm
Material	Aluminium
Industry	Bouncy castle handling
Brand	Alutruk
